Tag Name	X99600A
Total No. of Indcidents from 11/21/11-12/31/11	0

Please Note:
The Slick Watch has a tendency to alarm multiple times when it detects oil, therefore, an Incident means, the slick watch alarmed at least once in a 24 hour period. For all incidents with less than or equal to 5 alarms per 24hr period, the Shift Supervisor Log was used to verify that oil was visually present. On the Shift Supervisor log, oil seen in No.6 Sep is described as either "Light", "Medium", or "Heavy". The critical alarm tag for the SWADS (X99600A) was added to the current PI-data server (whipi.bp.com) on 11/21/2011. Prior to 11/21/2011, Tag X99600A existed on the old PI data server (whilakpi.bp.com); only 3 instances of "oil detected" were found (this was verified by a BP PI Subject Matter Expert) due to PI/tag malfunctions.
